

# Bench Grinders for Workshop Applications

These bench grinders are designed for a variety of grinding and sharpening applications. They feature robust construction for durability and reliable performance in workshop environments.

## Product Overview

### Industrial Bench Grinders

These bench grinders are engineered for versatile sharpening and grinding tasks in demanding workshop environments. Built with a focus on durability and reliable performance, they ensure consistent results for professional users. The range includes multiple sizes to accommodate varying wheel diameters and power needs, making them a staple for metalworking and maintenance applications.

## Safety and Design

### Safety Features

Adjustable Eye Shields, Spark Arrestors

## Product Models

### Model Range Table

Model
RBG150I
RBG200I
RBG250I

### Primary Applications

- Grinding
- Sharpening
