

Bench Vise - 83 Series

This bench vise is a robust tool for securely holding workpieces in machining and assembly. It is made from cast iron and features hardened steel jaws for a firm grip and long-lasting use.

Overview

Robust Bench Vise - 83 Series

The 83 series bench vise is a robust and versatile tool designed for securely holding workpieces during various machining, woodworking, and assembly operations. Constructed from high-quality cast iron, it provides exceptional strength and durability. The vice features hardened steel jaws with a serrated pattern for a firm grip and prevents slippage, making it ideal for both professional and DIY applications.

Construction & Design

Material	Cast Iron
Jaw Material	Hardened Steel
Grip Features	Serrated Pattern, Anti-Slip

Performance

Clamping Mechanism	Smooth-sliding screw
Mounting Type	Workbench Mount

Applications

Suitable Applications

- Machining
- Woodworking
- Assembly Operations
- Professional Use
- DIY Projects
