Product Overview

Professional Grade Clamping Solution

The GL-2202 Bench Vice is a robust and versatile tool designed for securely clamping workpieces during various machining, woodworking, and assembly operations. Constructed from high-strength cast iron, this vice offers exceptional durability and rigidity, minimizing vibration and ensuring precise and stable holding. It features hardened steel jaws with a serrated pattern for enhanced grip and reduced slippage, making it an ideal choice for professional workshops.

Construction & Design

Material & Build	High-strength cast iron, Hardened steel jaws
Base Rotation	360 degrees

Features

Core Features

- 360-degree swivel base for flexible positioning
- Serrated jaw pattern for enhanced grip
- Smooth-action lead screw handle
- Integrated mounting holes for workbench attachment

Applications

Recommended Use

Machining • Woodworking • Assembly • Heavy-duty garage work
