

Benchtop Drill Press

This drill press is a robust machine for precision drilling in various materials. It features a powerful motor, variable speed control, an adjustable worktable, and a depth stop for accurate and repeatable drilling.

Overview

Precision Benchtop Drilling

The ZJQ4120 drill press is a robust and versatile machine engineered for precision drilling across various materials. It features a powerful motor for consistent performance and variable speed control to adapt to specific task requirements. Its sturdy construction provides the stability and durability needed for both professional workshops and demanding DIY applications.

Performance

Key Performance Metrics

4120

Model Series

Operation & Control

Precision Features

- Adjustable worktable for flexible positioning
- Depth stop for accurate and repeatable drilling
- Sturdy construction for enhanced stability

Speed Control

Variable speed control for adapting to different drilling tasks

Applications

Target Applications

Professional • DIY • Precision Drilling • Multi-material

Build Quality

Construction

Robust and durable frame designed for industrial longevity
