

Benchtop Grinding Machine with 150mm Wheels

This heavy-duty bench grinder is designed for sharpening, grinding, and polishing various materials. It features a 1/3 HP motor operating at 230V and 50Hz, delivering a rotational speed of 2950 RPM.

Overview

Professional Benchtop Grinder

This 350W benchtop grinding machine is designed for precision sharpening, grinding, and material removal tasks. Featuring a robust motor capable of 2950 RPM, it provides the consistent power needed for both coarse and fine grinding applications. Its compact yet sturdy construction ensures stability during operation, making it an essential tool for workshop and industrial maintenance environments.
