Overview

Versatile Benchtop Polishing Solution

This benchtop polishing grinder is a compact and reliable tool designed for precision material finishing, grinding, and buffing tasks. Equipped with a flexible shaft attachment, it offers enhanced maneuverability for intricate and detailed work. The unit features a sturdy base for operational stability and variable speed control, making it an ideal choice for both professional workshops and detailed hobbyist projects.

Technical Specifications

Power Output	200 W
Input Voltage	220-240
Frequency	50 Hz
Performance Features	Variable Speed, Reversible Operation

Design & Safety

Included Components

- Grinding wheel
- Polishing wheel
- Flexible shaft attachment
- Eye shields
- Sturdy base

Safety Features

Integrated Eye Shields • Stable Base
