

# Benchtop Wood Planer

This wood planer is designed for precision woodworking. It features a powerful motor for smooth and consistent material removal.

## ADDITIONAL IMAGES

## Overview

### Precision Benchtop Wood Planer

This robust wood planer is engineered for precision woodworking, offering professional-grade performance for both workshops and dedicated hobbyists. Equipped with a powerful 1500W motor, it ensures smooth and consistent material removal across various timber surfaces. Its durable frame and precision-machined components provide the stability and accuracy required for high-quality finishing.

## Technical Specifications

### Key Performance Indicators

**1500 W**

Motor Power

**8500 rpm**

Spindle Speed

**330 mm**

Max Planning Width

### Operation Capacities

Feature	Value
Max Planning Thickness	2.8 mm
Max Planning Depth	152 mm
Blade Quantity	2

## Logistics and Handling

### Physical Specifications

- Net Weight: 33 kg
- Packing Dimensions: 635 x 410 x 480 mm
- 20' Container Capacity: 230 pcs

### Model Identification

MB-1305 (13")
