

Bent Nose Pipe Wrench

The bent nose pipe wrench is designed for gripping and turning pipes and fittings in tight spaces. Constructed from forged steel with hardened teeth, it ensures a secure grip on steel, iron, and PVC pipes.

Product Overview

Specialized Design for Confined Spaces

The bent nose pipe wrench is a specialized hand tool engineered for gripping and turning pipes and fittings in restricted areas. Its unique bent jaw configuration allows for superior access where standard straight wrenches fail. Built from durable forged steel with hardened teeth, it ensures a reliable grip on steel, iron, and PVC materials.

Technical Specifications

Compatible Pipe Materials

- Steel
- Iron
- PVC

Material	Forged Steel
Jaw Features	Hardened Teeth, Adjustable Opening, Bent Nose Design

Applications

Typical Applications

Plumbing • Pipefitting • General Maintenance
