

Bent Nose Pipe Wrench

This bent nose pipe wrench is designed for gripping and turning pipes and fittings. It features a forged steel construction, adjustable jaw, and comfortable handle, making it suitable for plumbing, construction, and maintenance.

Product Overview

Heavy-Duty Bent Nose Pipe Wrench

This heavy-duty bent nose pipe wrench is engineered for professional gripping and turning of pipes and fittings. Constructed from durable forged steel, it offers exceptional strength for demanding plumbing, construction, and maintenance tasks. The adjustable jaw accommodates various pipe sizes, while the ergonomic handle design provides increased leverage and reduces user fatigue during extended operation.
