Product Overview

Bent Nose Pipe Wrench

This specialized bent nose pipe wrench is engineered for professional plumbing and pipe fitting applications. Its unique bent jaw configuration provides superior access in confined or awkward spaces where standard straight wrenches fail. Constructed with drop-forged high-quality chrome vanadium or carbon steel, the tool features heat-treated bodies and induction-quenched teeth for maximum durability and grip strength.

Technical Specifications

Maximum Pipe Capacity

1.5 inch

Max Capacity

Manufacturing Process

- Drop forged handle and mobile jaw
- Heat-treated body
- Induction quenched jaw teeth

Material

Chrome Vanadium Steel, Carbon Steel

Features

Key Features

Bent Nose Design • Adjustable Jaw • Corrosion Resistant • Heavy Duty
