

Beryllium Bronze Combination Wrench Set

This combination wrench set is constructed from beryllium bronze alloy. The spark-free tools are suitable for use in environments where flammable or explosive materials are present.

Product Overview

Professional Non-Sparking Solution

This combination wrench set is engineered for high-stakes environments where safety is paramount. Constructed from premium beryllium bronze and aluminum bronze alloys, these tools are both non-sparking and anti-magnetic, making them essential for use in explosive or flammable atmospheres. The design features a versatile combination of open-end and box-end heads, with a high-neck profile that effectively clears obstacles during fastening tasks.

Technical Specifications

Safety Characteristics

Non-Sparking • Explosion-Proof • Anti-Magnetic

Material Composition

Beryllium Bronze Alloy, Aluminum Bronze Alloy

Manufacturing Process

Die Forging

Compliance & Standards

Certifications

ISO 9001:2008

Usage & Application

Primary Functions

- Striking
- Disassembling
- Fastening six-hexagon bolts and nuts
