

Bevel Adapter for Construction Machinery

These bevel adapters are designed for use in construction machinery, providing a secure connection between components at an angle. They are constructed from high-strength steel with a protective coating for corrosion resistance.

Product Overview

High-Strength Bevel Adapters

These bevel adapters are essential components for construction machinery, engineered to provide secure and reliable connections for various equipment attachments. Constructed from high-strength, durable metal with a protective coating, they are built to withstand demanding environments and resist corrosion. Available in 40mm and 45mm sizes, these precision-engineered parts ensure optimal performance and longevity for your heavy machinery.

Technical Specifications

Available Sizes

- 40mm
- 45mm

Part Number

6I6354

Weight

10.4 kg

Material Features

High-strength steel, Corrosion resistant, Protective coating
