

Bevel Edge Scraper with Plastic Handle

This bevel-edged scraper is designed for removing materials from surfaces. Its durable plastic handle provides a comfortable and secure grip.

Product Overview

Professional Bevel Edge Scraper

This bevel-edged scraper is engineered for precision surface preparation and material removal tasks. Featuring a durable, ergonomically designed plastic handle, it ensures a secure and comfortable grip during extended use. The triangular, angled blade design allows for efficient scraping, making it an essential tool for paint removal, cleaning, and general surface maintenance in professional environments.
