

Bi-Metal Hole Saw for Wood and Metal

This hole saw is made from durable bi-metal for sharpness and long life. It is designed for making precise holes in materials like wood, aluminum, copper, iron, stainless steel, and zinc.

Product Overview

High-Performance Bi-Metal Hole Saw

This professional-grade hole saw is engineered from high-quality bi-metal materials, ensuring exceptional sharpness and long-lasting durability for demanding tasks. Designed for precision, it delivers clean and accurate cuts across a wide range of materials, making it a versatile tool for various industrial and construction applications. Its robust construction guarantees reliability, whether you are working with soft woods or harder metals.

Technical Capabilities

Compatible Materials

Wood, Aluminum, Copper, Iron, Stainless Steel, Zinc

Material Composition

High-quality Bi-Metal

Performance Features

Key Benefits

- Exceptional sharpness for precise cutting
- High durability for extended tool life
- Versatile application across multiple material types
- Clean and accurate hole creation
