

# Bib Cock Valve for HVAC&R Systems

This bib cock valve is designed for HVAC&R applications. It effectively controls the flow of fluids within diverse systems.

## Bib cock

Code	Spec.
Y00112	1/2"
Y00113	3/4"

### ADDITIONAL IMAGES

## Product Overview

### Professional Bib Cock Valve for HVAC&R

This bib cock valve is engineered for precise fluid control within heating, ventilation, air conditioning, and refrigeration systems. Leveraging 20 years of manufacturing expertise, it offers a reliable solution for plumbing and heating applications where durability and cost-efficiency are paramount. The product is manufactured using green processes, ensuring a high-quality component that meets modern environmental and industrial standards.

## Technical Specifications

### Available Sizes

Product Code	Specification (Size)
Y00112	1/2"
Y00113	3/4"

## Manufacturing & Quality

### Industry Experience

**20 yrs**

Years of Expertise

### Manufacturing Highlights

- Large scale and cutting-edge manufacturing
- Green manufacturing processes
- Guaranteed quality and cost efficiency
- One-stop solution provider

## Application

Primary Application	HVAC&R Systems, Heating, Plumbing, Fluid Control
System Compatibility	Suitable for controlling flow in various HVAC&R and plumbing systems.
