

Bicycle Bell with Metal Dome

This bicycle bell provides a clear and audible warning signal for cyclists. It is constructed with a durable metal dome and a plastic lever and mounting bracket for easy installation on most bicycle handlebars.

Product Overview

Classic Safety Bell

This bicycle bell features a durable metal dome designed to provide a clear and audible warning signal for cyclists. Its compact construction ensures it fits easily on most handlebars without interfering with grips or controls, making it an ideal choice for urban commuting and recreational cycling. The reliable mechanism delivers a crisp, resonating ring to effectively alert pedestrians and other road users, significantly enhancing rider safety.

Technical Specifications

Materials	Metal Dome, Plastic Lever, Plastic Bracket
Installation	Compatible with most standard bicycle handlebars

Performance Features

Ideal For

- Urban commuting
- Recreational cycling
- Safety signaling

Key Benefits

Compact Design • Easy Installation • Audible Safety Signal

Sound Profile	Crisp and resonating ring
