

Bicycle Brake Cable

This bicycle brake cable is designed for optimal performance and reliability. It is constructed from durable materials to ensure consistent braking power and enhanced safety.

Overview

Reliable Braking Performance

This high-quality bicycle brake cable is engineered for optimal performance and consistent stopping power. Constructed from durable steel, it ensures long-lasting reliability across various cycling conditions. Designed for smooth and responsive operation, this cable enhances overall safety and control for a wide range of bicycle models and braking systems.

Technical Specifications

Material	Steel
Cable Diameter	1.5 mm
Cable Length	1.8 m
Model Number	DM-A7

Compatibility

Suitable For	Bicycle Brake Systems, Various Bicycle Models
