

Bicycle Brake Lever Set

This bicycle brake lever set is designed for caliper or cantilever brakes. Each lever has an integrated cable adjuster for fine-tuning brake tension.

Product Overview

High-Performance Alloy Brake Levers

This bicycle brake lever set features a durable alloy construction designed for reliable stopping power. The set includes a polished silver bracket paired with a striking blue lever arm for a distinct aesthetic. With a 3-finger design, these levers provide excellent leverage and control, making them an ideal upgrade or replacement for standard bicycle braking systems.
