

Bicycle Caliper Brake Set

High-performance bicycle caliper brake set designed for reliable stopping power. It features smooth actuation for consistent braking performance and includes all necessary hardware for easy installation.

Product Overview

High-Performance Braking Solution

This bicycle caliper brake set is engineered for reliable stopping power and consistent performance across various bicycle types. Constructed from durable light alloy, the design features smooth actuation and includes dual linear spring tension adjustment for precise control. Designed for both road and recreational cyclists, the system includes long-lasting brake pads that provide excellent grip and safety.

Technical Specifications

Material	Light alloy
Tension Adjustment	Dual linear spring
Model Identifier	BK-707011
