

Bicycle Cassette Sprocket Set

This high-quality bicycle cassette sprocket set is designed for smooth and efficient gear changes. It features multiple sprockets of varying sizes to provide a wide range of gearing options for different terrains and riding styles.

Product Overview

High-Performance Bicycle Cassette

This bicycle cassette sprocket set is engineered for cyclists seeking smooth and efficient gear transitions across various terrains. Designed with a versatile range of sprocket sizes, it provides the flexibility needed for both climbing and high-speed riding. The assembly is built from durable materials to ensure long-lasting performance and reliable power transfer during heavy use.

Technical Specifications

Installation Torque	40 N.M
Minimum Sprocket Size	12 T

Compatibility & Features

Design Features	Smooth Shifting, Durable Construction, Wide Gearing Range
Kit Inclusions	Yes
