

Bicycle Chainless Driveshaft Conversion Kit

This chainless driveshaft conversion kit replaces the standard chain drive on a bicycle, providing a cleaner and safer riding experience. It can be installed on various frame types, including those with suspension.

Product Overview

Chainless Drivetrain Technology

This innovative conversion kit replaces traditional bicycle chain drives with a high-performance shaft drive system. Designed for enhanced safety, cleanliness, and reduced maintenance, the system offers a smoother power transmission experience for riders. The kit is engineered for versatility, allowing it to be integrated with various bicycle frame styles, types, and suspension configurations.

Technical Specifications

Drive System Type	Shaft Drive Conversion
Compatibility	Universal Frame Fit, Suspension Compatible, Multi-Type Frame Support

Key Benefits

Advantages

- Cleaner operation (no grease)
- Enhanced safety
- Lighter weight construction
- Low maintenance design
