

Bicycle Crankset with Clear Chain Guard

This bicycle crankset features a durable metal crank arm attached to a clear plastic chain guard. The chain guard is designed to protect the rider's clothing from the chain and prevent debris from interfering with the drivetrain.

Product Overview

Durable Crankset with Integrated Protection

This bicycle crankset is engineered for reliability and efficient power transfer, featuring a robust metal alloy crank arm. It comes equipped with a clear plastic chain guard designed to protect the rider's clothing from the chain while minimizing debris interference with the drivetrain. The transparent guard design allows for quick and easy visual inspection of the chain and drivetrain components, making maintenance straightforward.

Technical Specifications

Construction Material	Metal Alloy
Protection Features	Clear Chain Guard, Clothing Protection, Debris Prevention

Compatibility

System Compatibility

- Standard bicycle bottom brackets
- Standard bicycle chains
