

Bicycle Crankset with Multiple Chainrings

This bicycle crankset features multiple chainrings for varied gearing options and is attached to a crank arm for pedal connection. Constructed from durable metal alloys, this component ensures efficient power transfer and reliable performance.

Product Overview

High-Performance Bicycle Crankset

This bicycle crankset is engineered for versatility and durability, featuring multiple chainrings to accommodate a wide range of gearing options. Constructed from robust metal alloys, it is designed to deliver efficient power transfer and reliable performance across diverse riding conditions. The assembly includes a central hub for seamless mounting to standard bicycle drivetrains, making it an essential upgrade for professional and enthusiast setups.

Technical Specifications

Key Features

- Efficient power transfer
- Reliable performance in diverse conditions
- Integrated central hub mounting
