

Bicycle Frame Finger Lock

This finger frame lock provides robust and reliable security for bicycles. It is constructed from hardened steel and reinforced with a durable polymer casing for exceptional resistance to cutting, sawing, and prying.

Product Overview

Robust Security Solution

The Finger Frame Lock is a robust and reliable security solution designed to protect bicycles from theft. Constructed from hardened steel and reinforced with a durable polymer casing, this lock offers exceptional resistance to cutting, sawing, and prying. Its unique finger-like design securely clamps around the bicycle frame, providing advanced protection against unauthorized removal, picking, and tampering.
