

Bicycle Friction Shifter Set

These bicycle shifters are designed for gear changes. The shifters feature textured levers for improved handling and are constructed from metal and plastic components.

Product Overview

Reliable Gear Control

This bicycle friction shifter set offers a classic and reliable solution for managing your drivetrain. Designed for intuitive gear changes, these shifters feature textured levers that ensure a secure grip even in varying conditions. Built with a robust combination of metal and plastic components, they provide the durability needed for consistent performance on the road or trail.
