

# Bicycle Front Derailleur

This bicycle front derailleur is designed to shift the chain between different chainrings. It features a clamp for attaching to the frame, a cage to guide the chain, and adjustment screws for fine-tuning the shifting performance.

## Overview

### High-Performance Front Derailleur

This mechanical front derailleur is engineered for smooth and reliable chain shifting across multi-speed bicycle drivetrains. Constructed from durable metal with precision adjustment screws, it ensures consistent performance and easy fine-tuning for optimal gear changes. The unit features an integrated clamp design for secure frame mounting and is compatible with standard SIS shifting systems.

## Technical Specifications

### Adjustment Features

- High-limit adjustment screw
- Low-limit adjustment screw
- Cable tension adjustment

### Mounting Style

Clamp-on

### Material

Metal with plastic components

### System Compatibility

SIS Compatible, Multi-speed
