

Bicycle Gear Shifters and Brake Lever Set

This set includes bicycle gear shifters and brake levers for handlebar mounting. They allow riders to control braking and gear shifting on multi-speed bikes.

Product Overview

Integrated Control System

This bicycle component set combines gear shifting and braking controls into a single, ergonomic handlebar-mounted unit. Designed for multi-speed bicycles, the system features intuitive twist-grip shifting with clear visual gear indicators. The integrated brake levers provide responsive stopping power, ensuring both safety and ease of operation for the rider.

Technical Specifications

Control Mechanism	Twist-grip shifter with integrated brake lever
Mounting Location	Handlebar
Compatibility	Multi-speed bicycles, Handlebar-mounted

Features

Key Features

- Integrated gear and brake control
- Twist-grip shifting mechanism
