

# Bicycle LED Headlight with Digital Display

This bicycle headlight features a bright LED for enhanced visibility in low-light conditions. It includes an integrated mounting bracket and a digital display showing battery level and operating mode.

## Overview

### High-Performance Bicycle Lighting

The CAT-88 bicycle front light is designed for cyclists who demand reliability and visibility. Crafted from durable aluminum alloy, this headlight features powerful XPG-3 LED beads and an integrated digital display to monitor battery life and operating modes. With a high-capacity 5000mAh battery, it ensures over 4 hours of strong illumination, making it an ideal choice for nighttime riding and diverse weather conditions.
