

Bicycle LED Headlight with Digital Display

This bicycle headlight provides high-intensity illumination for enhanced visibility. It features a digital display indicating battery level and multiple lighting modes.

Product Overview

High-Performance Bicycle Illumination

This high-intensity bicycle headlight is engineered for safety and visibility, featuring dual XML-L2 LED emitters that deliver a real output of 950 lumens. Encased in a durable aluminum alloy housing, it provides excellent heat dissipation and weather resistance with an IP65 rating. The integrated digital display keeps riders informed of battery status, while the versatile 360° rotating bracket ensures precise light positioning for any riding condition.
