

# Bicycle LED Rear Light

This bicycle LED rear light uses two SuperBrite LEDs to provide high brightness and visibility. The efficient LEDs maximize battery life and the light features a clean, curved design.

## Product Overview

### Integrated Illumination for Modern Cyclists

The Premium rack-mounted rear light combines high-performance optics with a sleek, aerodynamic design. Equipped with two efficient SuperBrite LEDs, it ensures maximum visibility for the rider in low-light conditions. Its specialized curvature is engineered to provide a seamless, integrated look when mounted on compatible bicycle racks.

## Technical Specifications

### Design Compatibility

- Arc rack compatible
- ArcLite rack compatible
- Curvature-matched integration

LED Type	SuperBrite LEDs
Number of LEDs	2
Mounting Type	Rack-mounted
