Product Overview

High-Performance Platform Pedals

These bicycle pedals are engineered for optimal performance and durability across various riding conditions. Featuring a robust aluminum construction and a wide platform design, they ensure enhanced stability and efficient power transfer for every cyclist. The textured surface provides excellent grip for secure footing, while the smooth-spinning bearings facilitate effortless pedaling during both urban commuting and trail riding.

Technical Specifications

Model Number	DM-965
Material	Aluminum Alloy
Compatibility	Standard Bicycle Cranks, Road Bikes, Mountain Bikes, Hybrid Bikes

Features & Benefits

Key Features

- Wide platform for enhanced stability
- Textured surface for superior grip
- Smooth-spinning bearing system
- Replaceable pins for customized traction

Performance Metrics

1 High Durability Rating	1 Optimized Power Transfer Efficiency
