

Bicycle Rear Carrier Light

This bicycle rear light mounts to a carrier for enhanced visibility. It features a bright LED and reflector, offering long battery life and compatibility with 16", 20", and 26" bikes.

Product Overview

Efficiency and Performance

The Arcus rack-mounted light is engineered for superior visibility and energy efficiency. Utilizing a single SuperBrite LED and patented electronics, it achieves a market-leading power consumption of just 23 mA. With a battery life exceeding 100 hours, it provides dependable illumination for commuters and casual riders alike.
