

Bicycle Rear Derailleur

This vintage-style bicycle rear derailleur employs a parallelogram design for smooth and precise gear changes. It is constructed from durable metal components and finished in black and silver.

Product Overview

Precision Engineering for Drivetrain Performance

This vintage-style rear derailleur utilizes a robust parallelogram design to ensure smooth and precise gear changes across your drivetrain. Constructed from durable metal components with a classic black and silver finish, it is built to withstand the rigors of regular use. Designed for easy installation, this component offers reliable performance for cyclists looking to maintain or restore their multi-speed bicycle systems.
