

Bicycle Rear Derailleur

This bicycle rear derailleur is designed for smooth and precise gear changes. Its lightweight alloy body incorporates adjustable screws for fine-tuning shifting performance and ensuring compatibility with various drivetrain configurations.

Product Overview

Precision Shifting Performance

This bicycle rear derailleur is engineered for smooth and precise gear changes, making it an essential component for reliable drivetrain performance. Constructed from a lightweight alloy, it offers an optimal balance of strength and weight savings for various cycling applications. The design features a sturdy mounting bracket and adjustable screws, allowing for fine-tuning to ensure compatibility with a wide range of drivetrain configurations.

Technical Specifications

Compatibility

- Various drivetrain configurations
- Multiple-tooth jockey wheel
- Standard mounting bracket

Construction Material

Lightweight Alloy

Adjustment Features

Fine-tuning screws, Adjustable shifting
