

Bicycle Rear Derailleur

This rear derailleur is designed for bicycle drivetrain systems. It features a parallelogram design to ensure smooth and precise gear changes.

Overview

Precision Drivetrain Component

This rear derailleur is engineered for high-performance bicycle drivetrain systems, utilizing a robust parallelogram design to ensure smooth and precise gear changes. Constructed from durable materials, it is built to withstand rigorous use while maintaining optimal shifting accuracy. Its versatile design allows for compatibility with a wide range of cassette sizes and chain types, making it a reliable solution for diverse riding conditions.

Technical Specifications

Design Type	Parallelogram
Key Performance Features	Smooth Shifting, Precise Gear Changes, High Durability, Reliable Performance

Compatibility

System Compatibility

- Various cassette sizes
- Multiple chain types
