

Bicycle Rear Derailleur with Red Jockey Wheels

This bicycle rear derailleur is a crucial component for shifting gears on multi-speed bicycles. It is constructed from metal and plastic components and designed for smooth and precise gear changes.

Product Overview

Precision Gear Shifting

This bicycle rear derailleur is engineered for smooth and precise gear changes, making it an essential component for multi-speed bicycle drivetrains. It features a robust parallelogram linkage for reliable lateral movement and a dedicated cage system to guide the chain effectively. The inclusion of red jockey wheels not only adds a distinct aesthetic but is designed to enhance chain engagement and minimize friction during operation.

Technical Details

Key Components

- Mounting bracket for frame attachment
- Adjustment screw for cable tension
- Parallelogram linkage
- Cage with jockey wheels

Construction Materials

Metal, Plastic

Performance

Jockey Wheel Color

Red

Friction Reduction

Yes
