

Bicycle Rear Derailleur

This rear derailleur is designed for bicycle drivetrain systems. It allows for smooth and precise gear shifting across various riding conditions and is compatible with multiple speed cassettes and chain types.

Product Overview

Precision Drivetrain Component

This bicycle rear derailleur is engineered for smooth and precise gear shifting across various riding conditions. Featuring a durable construction with a silver-colored body and black cage, it is designed to integrate seamlessly into diverse drivetrain systems. The inclusion of red jockey wheels adds a distinct visual element while maintaining functional reliability for multiple speed cassettes and chain types.
