

Bicycle Single Chainring Crankset with Guard

This bicycle crankset features a single chainring with an integrated crank arm. A clear plastic chain guard surrounds the chainring to protect the rider and prevent clothing from getting caught.

Product Overview

High-Performance Single Chainring Crankset

This bicycle crankset features a robust single chainring design paired with an integrated crank arm, specifically engineered for efficiency and safety. The inclusion of a clear protective chain guard prevents clothing from snagging and protects the rider from direct chain contact. With weight-reduction cutouts, this component is an ideal upgrade for single-speed bicycles or those utilizing internal gear hubs.

Technical Specifications

Safety Features

Integrated Chain Guard • Clothing Protection

Configuration	Single Chainring
Compatibility	Single-speed bikes, Internal gear hubs

Design & Construction

Design Details
