

# Bicycle Tire Inflator Pump

This bicycle tire inflator pump is designed for inflating bicycle tires quickly and efficiently. It features multiple valve adapters for compatibility with various tire types and a durable construction for long-lasting performance.

## ADDITIONAL IMAGES

## Overview

### High-Performance Bicycle Inflation

This bicycle tire inflator pump is engineered for reliability and efficient operation. Featuring a durable alloy body, it provides a stable and smooth inflation process for various tire types. Its ergonomic design and compact dimensions make it an essential tool for both professional maintenance and everyday cycling needs.

## Technical Specifications

Model Number	DM-ZF005
Body Material	Alloy
Dimensions	38 x 540 mm

## Key Features

### Usability Metrics

**540 mm**  
Length

**38 mm**  
Diameter

### Product Highlights

Alloy Body, High-Pressure, Ergonomic Handle, Stable Base, Universal Compatibility
