

Bicycle Twist Shifters Gear Set

These bicycle twist shifters are designed for gear changes. The left shifter is indexed for 1 to 7 gears, while the right shifter is indexed for 3 to 6 gears.

Product Overview

Precision Gear Control

This bicycle twist shifter gear set is engineered for smooth, reliable gear transitions across a variety of terrains. Designed with ergonomics in mind, the units feature textured grips to ensure optimal handling and control during shifting. The set includes both left and right shifters, providing a comprehensive solution for bicycle drivetrain management.
