

Bicycle V-Brake System

This bicycle V-brake system delivers reliable stopping power. Its adjustable brake pads ensure optimal rim contact, while its durable construction ensures long-lasting performance.

Product Overview

Reliable V-Brake System

This bicycle V-brake system is engineered to deliver consistent and reliable stopping power in diverse riding conditions. Constructed with durable materials, it features a user-friendly design that simplifies both installation and ongoing maintenance. The system is versatile, making it a suitable choice for a wide variety of bicycle types.

Technical Details

Material Composition	Steel-reinforced resin
Tension Adjustment	Dual spring tension adjustment

Features

Key Features

- Adjustable brake pads for optimal rim contact
- Durable construction for longevity
- Easy installation and maintenance design

Identification

Model Number

BK-707006
