

Bicycle Wheel Quick Release Skewer

This bicycle quick release skewer secures wheels to the frame. It features a steel rod, cam mechanism, and ergonomic lever.

Product Overview

High-Performance Quick Release Skewer

This bicycle quick release skewer is engineered for reliable and efficient wheel attachment, ensuring a secure fit for various bicycle frames. Featuring a durable steel rod and a precision-engineered cam mechanism, it provides consistent clamping force for safe riding. The ergonomic lever design allows for tool-free operation, making wheel removal and installation smooth and convenient.

Technical Specifications
