

Bicycle Wheel Quick Release Skewer

This high-quality bicycle quick release skewer is designed for secure and easy wheel mounting. It features a durable steel rod, precision-engineered cam mechanism, and ergonomic lever for optimal clamping force.

Product Overview

High-Performance Quick Release Skewer

This bicycle quick release skewer is engineered for secure, rapid wheel mounting and removal. Featuring a durable steel rod and a precision-engineered cam mechanism, it ensures optimal clamping force for safety and reliability. Designed with an ergonomic lever and conical springs, it provides smooth operation and even pressure distribution, making it an essential component for both front and rear wheel applications on standard bicycles.

Technical Details

Construction Material	Durable steel rod
Mechanism	Precision-engineered cam mechanism
Compatibility	Front Wheel, Rear Wheel, Standard Bicycles

Features

Key Features

- Ergonomic lever design
- Conical springs for even pressure
- Quick and easy installation
- High clamping force
