

# Bicycle Wheel Rim

These bicycle wheel rims are constructed from durable metal. Featuring evenly spaced spoke holes, they are designed for building or repairing bicycle wheels.

## Product Overview

### Professional Grade Bicycle Rims

These versatile bicycle rims are engineered for high-quality wheel building and repair. Available in a wide range of standard industry sizes, they feature a durable polished metal finish. The precise spacing of the spoke holes ensures structural integrity and performance across various bicycle types, making them an ideal choice for maintenance and custom assembly projects.
