

Biodegradable PLA Spork

This spork is made from plant-based PLA, a biodegradable and compostable material. It is suitable for single-use applications in food service, catering, and events.

Product Overview

Sustainable Dining Solution

These biodegradable PLA sporks offer a high-quality, eco-friendly alternative to traditional single-use plastic cutlery. Crafted from plant-based materials, they are fully compostable, making them an ideal choice for environmentally conscious food service providers, catering operations, and event organizers. Their versatile design combines the functionality of a spoon and fork, ensuring convenience without compromising sustainability.

Material	PLA (Polylactic Acid) - Plant-based
Sustainability	Biodegradable, Compostable, Plant-based
