

Biometric Fingerprint Time Attendance System

This fingerprint time attendance system accurately tracks employee hours. It uses biometric fingerprint identification and supports card authentication.

Overview

Professional Biometric Attendance Solution

The MX730 is a high-performance, portable biometric time attendance system designed for accurate and efficient workforce management. Utilizing the advanced Justouch fingerprint algorithm, it ensures rapid verification and high dependability for various environments including offices, factories, and banks. With standalone capabilities and multiple communication interfaces, this device offers a flexible solution for secure employee time tracking.

Capacity & Performance

Fingerprint Capacity	3000 users
Attendance Records	130000 records

Connectivity

Communication Interfaces	RS232, RS485, TCP/IP, USB
--------------------------	---------------------------

Features

Key Features

- Standalone operation (no PC connection required)
- Real-time record uploading
- Advanced Justouch fingerprint algorithm
- High verification accuracy and speed

Applications

Suitable Environments

Enterprise • Office • Factory • Bank • Restaurant
