

Biscuit Vacuum Packaging Machine

This stainless steel machine is designed for packaging biscuits. It utilizes a vacuum chamber to create an airtight seal, preserving product freshness and extending shelf life.

Overview

Professional Vacuum Packaging Solution

This stainless steel vacuum packaging machine is engineered for the efficient and reliable sealing of biscuits and similar food products. By utilizing an advanced vacuum chamber system, it effectively removes air to extend shelf life and preserve product freshness. The unit features an intuitive control panel, allowing operators to precisely adjust sealing time and vacuum pressure to meet specific production requirements.

Technical Specifications

Material Construction

Stainless Steel

Available Models

- DTDZ400B/1
- DTDZ500B/1
- DTDZ600B/1

Key Features

Control Features

Adjustable Sealing Time, Adjustable Vacuum Pressure, Automatic Packaging

Primary Application

Commercial and industrial biscuit production
