

Black Annealed Iron Binding Wire

This black annealed iron wire is known for its flexibility and workability due to the annealing process. It is suitable for binding, tying, and reinforcing in packaging, construction, and agricultural applications.

Product Overview

Black Annealed Iron Binding Wire

This high-quality black annealed iron wire is engineered for optimal flexibility and workability, achieved through a specialized annealing process. It serves as a versatile solution for binding, tying, and reinforcing across various industrial, construction, and agricultural applications. The black annealed finish ensures a uniform appearance and provides enhanced corrosion resistance for reliable performance in diverse project requirements.

Technical Specifications

Surface Finish

Black Annealed • Corrosion Resistant

Key Features

- High flexibility for easy handling
- Excellent workability
- Uniform appearance
- Enhanced corrosion resistance

Material Type

Black Annealed Iron

Primary Applications

Construction, Packaging, Agriculture, Binding, Tying, Reinforcing
