

Black Metal Support Rod with Bulbous Ends

This is a black metal rod with bulbous ends. It appears to be a connecting rod or support structure.

Product Overview

Professional Component Overview

This precision-engineered black metal support rod is designed for structural integrity in electronic assemblies. Featuring distinct bulbous ends, it provides reliable stability for monitor or device mounting applications. Its durable cylindrical design and glossy finish make it an ideal choice for high-quality industrial integration.

Physical Properties

Surface Finish	Glossy
Material Composition	Metal, Black Coated

Design Specifications

End Configuration	Bulbous/Spherical
Body Shape	Cylindrical
