

# Black Phosphate Drywall Screw

This drywall screw has a black phosphate coating and coarse thread. It is designed for efficient fastening into drywall and similar materials.

## Product Overview

### Professional Grade Drywall Fastening

The Black Phosphate Drywall Screw is engineered for efficient and reliable fastening in construction and interior finishing projects. Featuring a distinctive bugle head and sharp point, this screw is optimized for quick penetration into drywall and soft materials. The black phosphate coating provides essential corrosion resistance while minimizing glare for a clean, professional finish.

## Technical Specifications

### Coating

Black Phosphate • Corrosion Resistant

Head Type	Bugle Head
Point Type	Sharp Point
Thread Design	Coarse Thread

## Application

### Suitable Applications

- Drywall Installation
- Interior Construction
- DIY Projects
- Fastening to Soft Materials
